

The Cypress University Alliance

Cordially Invites You to Attend
A **PSoC™** Workshop

WHY:

- Learn all about Cypress PSoC technology. A family of mixed signal (analog, digital, and embedded MCU), programmable devices. PSoC is truly the world's first Programmable System-On-Chip (more info. @ www.cypress.com)
- Leave with the knowledge of PSoC Architecture and PSoC Creator Software and learn how you can get a free Development Kit. (5 PSoC 4 CY8CKIT-042 kits will be given away)

WHO SHOULD ATTEND?

Faculty and Students involved in senior project, digital, analog and embedded classes and design; as well as topics as diverse as robotics, mechatronics, industrial controls, and aeronautics.

WHEN: June 2, 2013 1 PM to 5 PM

WHERE:

AGENDA: PSoC Architecture Overview, SW and Dev Kit demos, Hands On Labs, Introduction to new PSoC 4 kit with an Arduino footprint with a PSoC 4 and PSoC 5LP on board.

More information is available about PSoC and the Cypress University Alliance at:

www.cypress.com/cua
